Key Product Features

3. What am I investing in ?

Fund Category/Type	Sukuk/Income
Benchmark	Malayan Banking Berhad Al-Mudharabah (GIA) 1-Month Rate
Investment strategy	<p>ARSIF will invest in Islamic money market instruments and RM-denominated short to medium-term sukuk (with maturity of no longer than five (5) years) with a following minimum credit rating:</p> <ul style="list-style-type: none">i. Short-term credit rating of P1 by RAM or MARC-1 by MARC; orii. Long-term credit rating of A1 by RAM or A+ by MARC. <p>If the credit rating of the instruments falls below the minimum rating, the Fund may dispose of the investment. However, the Fund reserves the right to maintain the investment if the downgrade is a temporary event.</p> <p>The Fund may also invest up to 30% of the Fund's NAV in Islamic negotiable instruments of deposit with tenure up to five (5) years. The issuers of the Islamic negotiable instruments of deposit must have a minimum credit rating of A3 by RAM or A- by MARC.</p> <p>In the event of a credit downgrade of the issuer below the minimum rating requirement or where the Manager at its discretion view that there is a likelihood of credit default, the Manager may decide to partially or fully unwind the particular instruments. A credit downgrade means that credit risk has increased but it does not mean that there will be a default. A credit downgrade will generally have no impact on the value of the Islamic negotiable instruments of deposit upon its maturity if a credit default did not occur. However, if the Manager chooses to unwind the instrument prior to its maturity, it may result in capital losses and these losses will be borne by the Fund and reflected in its NAV.</p> <p>The Fund may also invest in Islamic CIS provided that such Islamic CIS is consistent with the investment objective of the Fund.</p>

	<p>Although the Fund is actively managed, the frequency of its trading strategy will very much depend on market opportunities.</p> <p>The Fund shall hold a minimum of 2% of the Fund's NAV (or such other amount as may be agreed by the Manager and Trustee from time to time) in Islamic liquid assets such as cash and Islamic deposits.</p> <p>Note: "Short-term credit rating" refers to the credit rating of an instrument for a period of less than twelve (12) months issued by credit rating agency whereas "long-term credit rating" refers to a credit rating for a period of at least five (5) years.</p>
Launch date	5 th May 2022
Financial year-end	31 st March
Distribution policy	Subject to availability of income, the Fund will distribute income on a monthly basis by way of reinvestment in the form of additional units depending on the performance of the Fund.

4. Who am I investing with ?

Manager	<p>AmanahRaya Investment Management Sdn Bhd ("ARIM") is a licensed asset management company under the Capital Markets and Services Act and a wholly-owned subsidiary of Amanah Raya Berhad.</p> <p>With effect from 21 January 2010, ARIM has taken over the role of the Manager for the Fund from AmanahRaya Unit Trust Management Sdn Bhd ("ARUTM"). Over the years, ARIM has invested vast resources in building up its infrastructure to provide a top notch fund management service.</p> <p>ARIM also has wealth of experience and competency in managing multiple asset classes, for both Ringgit and non-Ringgit based investments, which include but not limited to equity, fixed income, unit trust, property, structured products and private equity.</p>
Trustee	Maybank Trustees Berhad
Shariah Advisor	BIMB Securities Sdn Bhd

Key Risks

5. What are the key risks associated with this product ?

General Risks

Market Risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
Liquidity Risk	Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the fund holds assets that are illiquid, or are difficult to dispose of, the value of the fund will be negatively affected when it has to sell such assets at unfavourable prices.
Inflation Risk	This is the risk that investors' investment in the unit trust fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investors' purchasing power even though the value of the investment in monetary terms has increased.
Manager's Risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.

Credit and Default Risk	Credit risk relates to the creditworthiness of the issuers of the sukuk and Islamic money market instruments and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the sukuk and Islamic money market instruments. In the case of rated sukuk and Islamic money market instruments, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a sukuk and Islamic money market instruments either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the sukuk and Islamic money market instruments. This could adversely affect the value of the fund.
Loan Financing Risk	This risk occurs when investors take a financing to finance their investment. The inherent risk of investing with financing includes investors being unable to service the financing payments. In the event units are used as collateral, an investor may be required to top-up the investors' existing instalment if the prices of units fall below a certain level due to market conditions, failing which, the units may be sold at a lower net asset value per unit as compared to the net asset value per unit at the point of purchase towards settling the financing taken. Investors who intend to finance an investment in Islamic unit trust fund, or for that matter any Shariah-compliant investment, are advised to seek for Islamic financing to finance their investment.
Non-Compliance Risk	This is the risk of the manager or the trustee not complying with their respective internal policies, the deed and its supplemental deed, securities law or guidelines issued by the regulators relevant to each party, which may adversely affect the performance of the fund when the manager or the trustee takes action to rectify the non-compliance. For example, non-compliance could occur due to factors such as human error or shortfalls in operational and administrative processes, or external factors such as market movements. This risk may be mitigated by having sufficient internal controls in place to ensure compliance with all applicable requirements at all times.

Specific Risks

Sukuk Issuer Risk	This risk refers to the individual risk of the respective companies issuing the securities. Sukuk issuer risk includes, but is not limited to, changes in consumer taste and demand, legal suits, competitive operating environments, changing industry conditions and mistakes made by the management. If the performance of a company (invested by the Fund) deteriorates, the company's sukuk will decline in value and this in turn may suppress the NAV of the Fund. The deterioration of the performance may also affect the liquidity of a sukuk. This risk can be minimised through diversification and by careful selection of sukuk.
Interest Rate Risk	<p>Sukuk prices generally fall when interest rates rise and vice versa. The Fund's NAV may fall when interest rates rise or are expected to rise. This will also have an effect on the valuation of sukuk. This risk could cause the decline of the valuation for the sukuk, and vice versa. To mitigate this risk the Manager will manage the duration of investment in sukuk. In times of rising interest rates, the duration will be shortened and vice versa.</p> <p>The change in interest rate environment may also have implication on the profit rates offered by Islamic deposits and Islamic money market instruments. When profit rates rise, Islamic money market instruments' prices generally decline and this may lower the market value of the Fund's investment in Islamic money market instruments. Profit rates fluctuation also affect the Islamic deposits' returns of the Fund. Profit rates offered by the Financial Institutions will fluctuate according to the overnight rate policy determined by BNM and this has direct correlation with the Fund's investment in Islamic deposits. The Fund's future reinvestment in Islamic deposits will benefit from the higher profit rate and in the event of falling profit rates, the Fund's future investment in Islamic deposits will be reinvested at lower profit rates which in turn will reduce the Fund's potential returns.</p> <p>The above interest rate is a general indicator that will have an impact on the management of the fund regardless whether it is an Islamic unit trust fund or otherwise. It does not in any way suggest that an Islamic unit trust fund will invest in conventional financial instruments.</p>
Income and Distribution Risk	It should be noted that the distribution of income is not guaranteed. Circumstances preventing the distribution of income include, among others, insufficient realized returns to enable income distribution. As per the SC Guidelines, distribution of income should only be made from realized gains or realized income.
Shariah Status Reclassification Risk	<p>This risk refers to the risk of a possibility that the currently held sukuk or Islamic money market instruments or Islamic deposits invested by the Fund may be declared as Shariah non-compliant by the relevant authority or the Shariah Adviser. If this occurs, the Manager will take the necessary steps to dispose of or withdraw such sukuk or money market instruments or deposits.</p> <p>Note: Please refer to cleansing process for the Fund for details.</p>

Islamic CIS Risk	This risk refers to any adverse effect on the Islamic CIS in which the Fund is investing that will impact the NAV of the Fund. For example, the Islamic CIS may underperform its benchmark due to poor market conditions and as a result, the NAV of the Fund will be adversely affected since the performance of the Fund is dependent on the performance of the Islamic CIS. While the Manager will exercise due skill and care in selecting the Islamic CIS, it does not have control over the management of the Islamic CIS and there is no guarantee that the investment objective of the Islamic CIS will be met.

PERFORMANCE OF THE FUND

10. Average Total Return (in %)

Below are Average Total Return of the Funds for 1 year.

1-year (1.04.23 – 31.03.24)
5.11%

Basis of calculation for Average Total Return

Average Total Return (%) = Total Returns / Number of Years Under Review

11. ARSIF Return vs Benchmark

As at 31 st March	ARSIF (%)	Benchmark (%)	Out/(Under) Performance (%)
1-year	5.11	2.10	3.01

Comment on Fund Performance

For the financial year ended 31st March 2024, the Fund registered a 5.11% return compared to the benchmark return of 2.10%, thus outperforming the benchmark by 3.01%.

12. Portfolio Turnover Ratio

The Portfolio Turnover Ratio (PTR) indicates the frequency of turnover for a particular fund in any given calendar year. It is calculated by taking the average of acquisitions and disposal of securities divided by the average value of the Fund for the year calculated on a daily basis.

Financial Year	2024	2023
PTR (time)	0.89 times	1.03 times

The decrease of PTR for the financial year under review was due to Fund Manager less active in sukuk trading activities.

Basis of calculation for Portfolio Turnover Ratio

Portfolio Turnover = $\frac{\text{(Total acquisition for the year + Total disposal for the year)}}{2 \text{ Average value of the Fund for the year calculated on a daily basis}}$

13. Distribution Record

Financial Year	2024	2023
Gross Distribution per Unit (sen)	4.27	2.75
Net Distribution per Unit (sen)	4.27	2.75
